

Comité International Radio-Maritime

International association for marine electronics companies

Originally founded in 1928, CIRM is the international association for marine electronics companies.

Since those days of the radiotelegraph our scope of interest has expanded to encompass all modern bridge navigation and communication systems.

Today our Members include manufacturers, service companies, equipment suppliers, system integrators, application providers and other related businesses.

CIRM provides our Member companies with best-in-class technical and regulatory information, ensuring their capabilities are not compromised by unexpected changes in applicable standards or guidelines.

Scope of technical interest

- Ship navigational equipment & systems
- Maritime radiocommunications & GMDSS
- Integration & automation of bridge systems
- Ship/shore interface
- Autonomous shipping
- Maritime cyber security

Membership benefits

- Receive the latest industry technical and regulatory information
- Participate in CIRM conferences, workshops, webinars, and Working Groups
- Network with industry decision-makers
- Participate directly in international standards and regulatory meetings

Gain an edge with CIRM membership

If you are engaged in marine electronics and have a need to understand/comply with the many applicable international rules and regulations, **you will benefit from CIRM membership.**

Standards-setting and regulatory bodies such as the IMO, ITU, IEC and ISO publish enormous amounts of information of potential relevance to your business. CIRM digests that information and provides you with the relevant parts in an accessible format.

CIRM also participates directly in meetings of these bodies, representing your interests when regulations and standards that affect your business are under development or revision.

CIRM events enable you to gather with your industry peers in order to exchange information and opportunities, while receiving the latest industry information from guest speakers and industry experts.

CIRM Member companies are informed, influential, and connected.

Functions

CIRM represents the interests of the marine electronics industry on a global basis

We have over 100 member companies located across 6 continents

We provide a specialist information service for our Members

Our Technical Office provides Members with the latest industry information, including meeting and event reports and a monthly Technical Bulletin

We co-ordinate Members' views when resolving regulatory issues

CIRM stays in touch with our Members' opinions and ensures their views are fed into industry discussions

We provide a forum for Members to exchange information and business opportunities

Our Annual Conference provides cutting edge technical and business-oriented content

We provide technical and industrial advice to the international regulatory organisations

CIRM holds Observer, Liaison, or Consultative status with all key bodies

We enable our Members to participate in the development of international regulations, standards, and Type Approval requirements affecting their products and services

CIRM is highly active at international standards organizations, including IMO, ITU, IEC, ISO, IHO, etc.
